Portfolio

Summary

Frontend Developer with industry experience building scalable enterprise SaaS applications using React, Next.js, TypeScript, and modern frontend tooling. Skilled in API integration, responsive UI development, testing, debugging, CI/CD workflows, and collaborating within agile teams to deliver production-ready software solutions.

Work Experience

Barracuda Networks

10/2025 – Present

Frontend Developer Intern | Data Protection Team

Bangalore, India

- Developed and delivered scalable frontend features for enterprise SaaS cloud backup products using React, Next.js, TypeScript, and Material UI, improving usability across Reports and Backup Sources modules.
- Troubleshoot and resolved production issues in multi-tenant SaaS environments through root cause analysis, debugging, and collaboration with cross-functional engineering teams, ensuring reliable customer-facing releases
- Built reusable UI components and implemented unit and integration tests using Jest and React Testing Library, improving code maintainability and reducing regression risks.
- Leveraged AI-driven development practices through AI Dev Days training by building internal productivity tools, including Start-Story for Jira-Confluence planning and Self-Review for automated code standards validation

IIIT Dharwad

02/2025 – 05/2025

Software Development Intern

Hybrid

- Contributed to an AI-driven sustainability application during a 12-week internship, building the user-facing recommendation interface for reducing individual carbon footprints
- Integrated ML prediction APIs into the frontend and collaborated with researchers to present data-driven sustainability insights to end users

Education

Alva's Institute of Engineering & Technology (VTU)

12/2022 – 05/ 2026

Bachelor of Engineering in Electronics and Communication Engineering (CGPA: 7.9/10)

Karnataka, India

Gopalaswamy PU College

07/2022

Pre-University (Percentage: 87.5%)

Karnataka, India

Sadvidya High School

08/2020

SSLC / X (Percentage: 93.28%)

Karnataka, India

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, Java, Dart, SQL

Frameworks & Libraries: React.js, Next.js, Material UI , Tailwind CSS, Flutter

Testing: Jest, React Testing Library

DevOps & Tools: Git, GitHub, Azure DevOps CI/CD, ArgoCD, Kubernetes (kubect), Vercel

Collaboration: Jira, Confluence, Figma, Slack, Agile/Scrum

Certifications

- Developing Front-End Apps with React – IBM (Coursera)
- Java Full Stack – Wipro TalentNext

Projects

Mystery Messenger – Anonymous Messaging Platform

Next.js, TypeScript, MongoDB, NextAuth.js

- Built a full-stack Next.js application enabling anonymous messaging with OTP-based email verification (Nodemailer) and session-based authentication (NextAuth.js)
- Integrated Gemini API for AI-powered message suggestions and developed a responsive mobile-first UI.

Bug Blaster – Issue Tracking System

React.js, Axios, MongoDB, REST API

- Developed a React-based issue tracker with full CRUD operations, priority-based sorting, and a filterable dashboard for efficient bug management
- Implemented RESTful API integration with Axios, including error boundary handling and loading states for seamless user experience

Achievements

- Secured first place at **Fusion Techathon 3.0** (2024) and **Technova** (2023), developing innovative technical solutions and securing first place in both competitions at AIET
- Student Leader of **Edwin Lab** open-source club, conducting STEM workshops for 100+ students and delivering talks at the International Cultural Jamboree (3000+ attendees)
